About Me

Software Engineer with 4 years of hands-on experience crafting software that works in the real world. Passionate about clean architecture, performance, and delivering solutions that make a measurable impact.

Skills

Backend : Python, Spring Boot, Node.js, Apex, PHP
Frontend : React.js, Vue.js, Angular, JS, TS
Testing : JIRA, Xray, Postman, Integration Testing, JUnit
DevOps : Docker, Kubernetes, Jenkins, CI/CD
Database : MySQL, PostgreSQL, MongoDB
Methodologies : Agile/Scrum
Business Process : Salesforce, Odoo, RPA, ServiceNow, Ai integration
Communication : English, French, Arabic

Education

Master of Science in Software Engineering
ENSA   2020 - 2022

Focused on advanced software development, algorithms, and system design. Completed projects in full-stack development, cloud-based applications, and software optimization. Gained practical experience with Java, Python, and collaborative software engineering methodologies.

Bachelor in Computer Science
Abdelmalek Essaadi   2018 - 2020

Studied core computer science fundamentals including programming, data structures, and databases. Developed practical skills in web development, software testing, and project-based learning in collaborative environments.

Experience

Full Stack Engineer
SQUAREFEET   2024 - Pres

I drive the development of PropTech solutions, ensuring high-quality, reliable software releases. I manage and maintain complex data, streamline processes through automation, and focus on creating efficient, user-friendly tools that deliver value.

Backend Developer
HAHN SOFTWARE   2023 - 2024

I developed a critical IT ticketing platform, covering architecture, testing, and reliability. I implemented CI/CD pipelines, improved system monitoring, and optimized performance to deliver a robust and maintainable solution.

Full stack Developer
xHub   2022 - 2023

As a Full Stack Developer at xHub, I built real-time social media platforms for live events, creating modern frontends with React.js and performant backends with Spring Boot. I optimized systems for low-latency data streaming, enhanced UX and responsiveness, and contributed to Agile development, CI/CD pipelines.

Full stack Developer
Technopark - Intern   2021- 2022

I developed an interactive 2D/3D visualization platform with Angular and Spring Boot, integrated Salesforce APIs for real-time data sync, and ensured reliable system integration through testing and collaborative development practices.
